

Five Star Student Scholarship

Meet the 2023 Recipient

Joel Andrews

Cowarts, Alabama

Program of Study

Academic Transfer / Agriculture-Science

When I was awarded this scholarship I felt very excited and proud of my accomplishments. This scholarship took some financial stress off my family as I am their first kid attending college. It is very important for me to complete a college degree because this allows me to achieve my goals. Earning a degree allows me to have more availabilities in earning a job, starting a career, and starting my adult life.

After graduating from WCC I plan on furthering my education in Agri-Science.
I plan to continue studying at a four year university after I graduate.

Meghan Dupriest

Cowarts, Alabama

Program of Study

Associate Degree Nursing

I knew this scholarship would help me in the way of being financially able to complete school. I am a single mother of 2 girls. I work, but hours at work are limited due to class time and clinical time. It has helped out in the way of tuition, books, and fees. I do receive financial aid as well, but it doesn't always cover all of the expenses. I want to complete a college degree to set a better example for my 2 girls. I want them to know that they can do anything that they set their mind to. Once completed, I will only be the second person in my family that has completed a college degree.

I plan to continue to work in the IV infusion room for Dr. Edmund LaCour, Rheumatology. I love the relationships that I have built with my patients and look forward to being able to better serve them. I have considered going on to finish my BSN at Troy of Dothan.

Dothan, Alabama

Program of Study

**Academic Transfer / Computer
Information Science**

Originally, I had received the notification that I had received no scholarships, which was a disappointing thought coming from low income and working a full-time job worried about affording college. Within a week after I was notified this, I received an email updating me that I had actually received a scholarship, and it brought excitement to me and my family. I am ever so grateful for this opportunity to continue college in hope of reaching my goals as a student. I hope to be one of the first in my close family to achieve a college degree, along with allowing me to enter the field of computer science after graduation and transferring.

After my graduation at Wallace, I plan to attend Troy of Dothan to get my computer science degree and to achieve a minor in automotive. I hope with these credentials I can achieve my dream job of programming and manufacturing computer systems for new generations of vehicles under Chevy and General Motors.

Five Star Student Scholarship

Meet the 2023 Recipient

Isabella Henley

Campbellton, FL

Program of Study Physical Therapist Assistant

In order to attend the Wallace PTA program I have to travel forty-five minutes one way. Receiving this scholarship is helping with my school tuition making it possible to complete school while working minimal hours. I have dreamed of being a PTA since I was twelve years old. Completing my college degree makes it possible for me to work in this occupation where I get to help people in their time of need.

I love children and working children, I plan to work in a pediatric clinic in the Wiregrass area when I graduate with my degree in Physical Therapist Assistant.
